

Peak Load Forecast Metadata

Report Category: Current

METADATA

Data Description

This report presents the day-ahead forecast load (AIL) as a percentage of the month-to-date peak demand for each hour of the current day and following 6 days.

When forecasting into the next month the report presents the day-ahead forecast load (AIL) as a percentage of the peak forecast demand in that period.

The header row indicates the actual month to date peak demand and the date on which it was set. When forecasting into the next month the report presents the forecasted peak AIL in the period and the date on which it is expected.

This report does not contain reconciled data and is provided for information purposes only and is not to be relied upon for any other purpose than what is stated.
