METADATA

Data Description

This public report looks 6 hours forward and backward, providing information to participants regarding calculations related to the reference unit as defined in the Market Power Mitigation Regulation. This includes the running total of the cumulative monthly settlement interval net revenue as well as what was calculated as 1/6th annualized unavoidable costs.

This report also contains a column showing the secondary offer price limit, where a N/A means the secondary offer cap is not in effect and a null value means it has yet to be determined if the secondary offer cap will be in effect.

Definitions of Column Content

- **Column 1** – Date and Hour Ending (HE) of settlement interval
- **Column 2** – The Calculated Cumulative Monthly Net Revenue
- **Column 3** – The 1/6th Annualized Unavoidable Cost calculated for the month
- **Column 4** – The Offer Price Limit that has been determined by the ISO. N/A means no limit in effect and null means yet to be determined.

Available Formats

- HTML
- CSV

Timing of Updates

This report is updated hourly when new information is available.
